Just a quick update. I have been working with Region 4, Kentucky DEP, Region 3 and ORSANCO all day on the spill. Region 4 has set up a command post at the ORSANCO (East side of Cincinnati) offices and will be working out of here for an undetermined number of days. I will be assisting.

ERT activities have been helping identify and obtain data, coordinate analytical discussions, and help plan future activities. I have enlisted Raj's assistance with the lab/analytical discussions. We may be requested to help with analytical, but this is still in the formulation stage..

Harry, Angela,

This evening, both Greg and I talked to Art Smith, OSC, Region 4, Louisville regarding

the WV chemical spill and it's impact on Kentucky water supplies. The state of Kentucky is worried about the impact on their water supplies. They would like to do some analysis on the Ohio as the material moves down stream.

Region 4 may be requesting support from ERT on analytical methods,etc. Greg and I let Art know that ERT has not been asked by Region 3 to provide any assistance.

Art will be in Cincinnati tomorrow and he would like me to accompany him to meet with ORSANCO tomorrow.

I will give you a call in the morning.
